HTAD I, II, III, Course # 4

HTAD COURSE #4

The stock set-out indicated on the diagram relates to courses that begin with a gather. The location of the take pen and/or repen may vary from the location for the repen shown on the diagram, so long as it is at the same end of the arena as shown. The handler's post is located 20 ft. from the North fence, in the center. The panel obstacle is set 20 ft. from the West side of the arena, at least 110 ft. from the handler's post; the opening is 12 ft. The L-shaped obstacle is located in the Northwest corner of the arena. Both sides of the obstacle are 10 ft. long with an aisle 4 ft. wide. The freestanding pen is located 30 ft. from the East side and approximately one-third of the length of the arena from the North and should be 8-10 ft. on each side for sheep, 10-16 ft. on each side for cattle. (A trailer may be substituted for the pen.) The hold area is located approximately in the center of the arena. The area for sorts other than a gate sort is located approximately halfway between the hold area and the repen gate. For poultry, all dimensions are ½ that of hooped stock.

1. Gather or Take pen

Gather: The stock are let out at the repen gate and allowed to settle. In HTAD III, the handler remains at the post while the dog is sent from there to gather the stock. In HTAD II, the handler may leave the dog at the handler's post and move to a point approximately halfway between the post and the stock, then send the dog to gather the stock. In HTAD I, the handler may leave the dog at a point approximately halfway between the post and the stock and move to approximately 15 ft. from the stock, then send the dog to gather the stock. At all three levels the stock are brought to and around the handler's post, passing just to the East of the handler's post and then turning toward Obstacle 1. The gather ends when the stock have gone just past the handler's post.

Take pen: HTAD III handlers must remain outside the pen while the dog brings out the stock. HTAD II handlers may enter the pen with the dog but should not move the stock themselves. HTAD I handlers may enter the pen and assist the dog in moving the stock. An exception is made for cattle, where the handler may go in and assist if necessary at any level. If the stock come out on their own volition without the handler or dog entering, there is no penalty. Once the gate to the take pen is opened, it may not be closed until the stock have exited. The stock are then taken to the point on the course where the handler's post is located for the drive. Scoring for the take pen ends when the stock have reached the

handler's post. The course then proceeds as indicated in the description.

2. Drive

The stock are driven to Obstacle 1. HTAD III handlers must stay at handler's post. HTAD II handlers may go to a point halfway to Obstacle 1, then must remain there for the remainder of the drive. HTAD I handlers may accompany the stock up to Obstacle 1. The drive ends when the stock reach a point 10 ft. in front of Obstacle 1.

3. Obstacle 1

The stock are moved through the freestanding panels. The handlers remain at the designated locations while the stock are taken through the panels. While HTAD I handlers may go up to the panels, they should not precede the stock through the panels. Once the stock have cleared the obstacle, handlers are free to move. Once the stock have gone through the panels, they are turned toward the West side of the arena, then back toward the North side, toward Obstacle 2. Scoring for this section ends when the stock have been turned toward Obstacle 2 and have moved past the end of Obstacle 1 closest to the West side of the arena.

4. Obstacle 2

The stock should enter at the South opening of the obstacle and exit heading East. HTAD III handlers must remain South of a handler's line running from the handler's post to the West fence parallel to the North fence, and may not pass that line until the stock have exited. HTAD II handlers must go to the entrance of the obstacle and remain in that location until the stock have exited. HTAD I handlers may move anywhere relative to the obstacle but may not enter it. Scoring ends when the animals have exited.

5. Obstacle 3

The stock are taken across the arena and put into the freestanding pen. Scoring for the pen ends when the gate is closed.

6. Hold

The animals are taken to the hold area. The stock is settled and briefly held in place. There is no required position for handler or dog. The judge signals the end of the hold/settle. HTAD I and II handlers then take the stock to the repen. HTAD III handlers proceed with the sort.

7. Sort

The sort is done by HTAD III handlers only. The stock is moved to the designated area, which depends on the type of sort being done. The sort may be one of the following: (a) Gate sort. (b) Ribbon-removal/shed. The sort ends when the gate is closed on the sorted animals, or when the ribbon has been removed/ animals have been shed.

8. Repen

The stock are taken to the repen and held a short distance off the gate while it is opened, and then are repenned. When a gate sort has been used, the animals that had been left out in the arena are repenned. The run ends when the repen gate is closed after the last animal has exited the arena.

The location of the take pen and/or repen may vary from the location for the repen shown on the diagram, so long as it is at the same end of the arena as shown. The handler's post is located a minimum of 100 ft. from the stock set-out area, 6 ft. to the West of the North/South centerline of the arena. The chute is located on the West side of the arena, with the entrance approximately 20 ft. South of the mid-point between the North and South ends of the arena, the entrance on the North and the exit on the South end. The chute should be no less than 12 feet long and no more than 4 feet wide with an opening of 8 ft. (A bridge may be substituted for the chute.) A handler's line extends across the arena from West to East even with the North end of the chute. The panel obstacle has a 12 ft. opening and is located 20 ft. off of the North fence, parallel to the North fence and an equal distance from the East and West sides. The freestanding pen is located 30 ft. from the East side and 30 ft. from the South side of the arena, and should be 8-10 ft. on each side for sheep, 10-16 ft. on each side for cattle. 2. Obstacle 1

The stock should enter at the North opening of the obstacle and exit to the South. HTAD III handlers must remain at the opening of the obstacle until the stock have exited. HTAD II handlers may move along the wing of the obstacle but may not move past the wing until the

stock have exited. HTAD I handlers may move anywhere relative to the obstacle but may not enter it. Scoring for Obstacle 1 ends when the animals have exited.

3. Drive

After the stock exit the chute, they are turned back toward the North along the approximate North/South centerline of the arena. Going toward Obstacle 2, they should pass just to the East of the handler's post. HTAD III handlers must remain behind the handler's line. HTAD II handlers may accompany the stock to a point halfway to Obstacle 2, then must remain there for the rest of the drive. HTAD I handlers may accompany the stock up to Obstacle 2. The drive ends when the stock reach a point 10 ft. in front of Obstacle 2.

While HTAD I handlers may go up to the panels, they should not precede the stock through the panels. Once the stock have gone through the panels, handlers are free to move. The stock are turned to the West and then to the South past the West end of the obstacle and onto a line that will take them fairly directly to the area in front of the pen. Scoring for Obstacle 2 ends when the stock have passed to the South of the West end of the obstacle.

5. Obstacle 3

The stock are penned in the freestanding pen. Scoring for the pen ends when the pen gate is closed.

6. Hold

The animals are taken to the hold area. The stock is settled and briefly held in place. There is no required position for handler or dog. The judge signals the end of the hold/settle. HTAD I and II handlers then take the stock to the repen. HTAD III handlers proceed with the sort.

Directions

Autobahn A3 from north:

take exit „Hösbach/Mömbris/Schöllkrippen/Laufach“.

At the first traffic light turn right; after several 100 m you go through the round traffic and go back
on the same road, then turn left to „Haibach / Winzenhohl“;

stay on that road until you come to our village “Winzenhohl”; stay on that road still; you will see a
wooden stable on your right with a sign on it saying: “LZ Lorenz Zilch”...voila...you are there!

Probably we are already in the herding arena.

You walk with your dog up the hill. Its right there on top of the hill.

Or you drive through the village and turn right after the last house on the right side; there is a
small “street” leading into the forest, turn right and follow the path parallel to the pasture.

Autobahn A3 from south:

Take exit “Waldaschaff”; turn left at the first crossing and right at the next one; when you come
into the village of “Hösbach/Bhf.” You see a sign on your left saying “Haibach / Winzenhohl”, turn
left here.

stay on that road until you come to our village “Winzenhohl”; stay on that road still; you will see a
